

## Press release

A report from the Approved Racing Laboratory *QuantiLab* has confirmed the presence of a prohibited substance, namely Ipratropium, in the post-race urine sample of Horse Canford Lights, which ran and won Race 4 during Race Meeting 18, run at the Champ de Mars racecourse on 31<sup>st</sup> August 2024.

The Trainer has been informed of the results, and has been given the option to send the B Sample for analysis by a Confirmatory Laboratory.

An inquiry has been opened into the matter.
